# 1. Overview

The NASDAQ Texas system accepts limit orders from participants and executes matching orders when possible. Non-matching orders may be added to the NASDAQ Texas Limit Order Book or routed out to the street based on the participant's routing strategy.

Routing and Special Handling (RASHSM) is a simple proprietary protocol that allows NASDAQ Texas participants to enter orders, cancel existing orders and receive executions. RASH allows participants to use advanced functionality, including discretion, random reserve, pegging and routing. It is intended to allow participants and their software developers to integrate NASDAQ Texas into their proprietary trading systems or build custom front ends.

RASH only provides a method for participants to send orders to NASDAQ Texas and receive updates on those orders entered. For information about all orders entered into and executed on the NASDAQ Texas book, refer to the ITCH protocol (available separately).

RASH is a low-level proprietary protocol for connecting to NASDAQ Texas. It is designed to offer the maximum possible performance at the cost of flexibility and ease of use. For applications that do not require this extreme level of performance, NASDAQ Texas offers other, more standard interfaces, such as FIX, that may be more suitable and easier to develop to.

## 1.1. Architecture

The RASH protocol is composed of messages passed between the RASH machine and the client application. Each message type has a fixed message length. All messages are composed of non-control ASCII bytes.

All messages sent from the RASH host to the client are assumed to be sequenced, and their delivery must be guaranteed by some lower level protocol. The SoupTCP (available separately) is typically used to guarantee the delivery and sequencing of RASH messages sent from the host to the client.

Messages sent from the RASH client to the host are inherently non-guaranteed, even if they are carried by a lower level protocol that guarantees delivery (like TCP/IP sockets). Therefore, all host-bound messages are designed so that they can be benignly re-sent for robust recovery from connection and application failures.

Each physical RASH host port is bound to a NASDAQ Texas assigned logical RASH Account. On a given day, every order entered on RASH is uniquely identified by the combination of the logical RASH Account and the participant-created Token field

## 1.2. Data Types

Numeric fields are a string of ASCII-coded digits, right-justified and zero-filled on the left. Alpha fields are left-justified and padded on the right with spaces.

Prices are given in decimal format with six whole number places followed by four decimal digits. The whole number portion is padded on the left with zeros; the decimal portion is padded on the right with zeros. The decimal point is implied by position; it does not appear inside the price field. The maximum valid price value on the NASDAQ Texas system is $200,000.00

Timestamp fields are given in milliseconds past midnight, Eastern Time (ET).

## 1.3. Fault Redundancy

A single RASH account can be bound to two physical RASH machines. These RASH machines then act as mirrors of each other for fault redundancy. In this configuration, both machines are able to accept and cancel orders and any outbound messages would be simultaneously generated by both physical RASH hosts.

## 1.4. Service Bureau Configuration

A single RASH account can accept orders from one or more firms, allowing a service bureau configuration. The service bureau RASH account must be specifically authorized to enter orders on behalf of each represented participant with a NASDAQ Texas Service Bureau Agreement, available separately. Once an agreement has been submitted, the RASH account set up as the

service bureau may enter orders for the represented firm by putting the represented firm's Market Maker Identifier in the Firm field upon order entry.

# 2. Inbound Messages

Inbound messages are sent from the participant's application to the RASH host. They are not sequenced. All Inbound Messages may be repeated benignly. This gives the client the ability to re-send any Inbound message if it is uncertain whether NASDAQ Texas received it in the case of a connection loss or application error.

The idea of benign inbound message retransmission with end-to-end acknowledgement is fundamental to NASDAQ Texas's fail-over redundancy. Should your connection ever fail, there is no way for you to know if pending messages actually made it over the link before the failure. A robust RASH client can safely re-send any pending messages over a mirrored link without worrying about generating duplicates. This applies to NASDAQ Texas's disaster fail-over capability as well; should NASDAQ Texas ever need to fail-over to the backup site, some messages sent at the moment of failure may be lost. A robust application can simply re-send the pending messages, making the fail-over seamless to the end user.

DISCLAIMER: The specifications contain more functionality than what is in production. Functionality that is not currently available will be greyed out in the specs. Any changes will be conveyed via the NASDAQ Texas Head Trader Alerts (HTA's).

## 2.1. Enter Order Message

The Enter Order Message lets you enter a new order into NASDAQ Texas. Each new order must have a Token that is unique to the day and that logical RASH Port account. If you send a valid order, you should receive an Accepted Order Message. If you send an Enter Order Message with a previously used Token, the new order will be ignored. Please note that if you send a poorly formatted order, the port will drop you.

In order to send a market order, the Peg Type field must be set to "P". The Price field on this market order can be anything from zero to $200,000.00. If a price greater than zero is specified, the market order will be capped at the price given. Note that the primary peg works the same way as market — where a price can be given to limit the peg. Beware that a Price field of zero is accepted only on orders that have a Peg Type other than "N". If a zero Price field is received when the Peg Type is "N", the client connection will be dropped.

Random Reserve is a feature for reserve orders that changes the displayed amount of shares every time the displayed shares are depleted. Random Reserve works as a range from the Max Floor. In other words, the maximum amount displayed will

be the Max Floor plus the Random Reserve, and the minimum amount displayed will be the Max Floor minus the Random Reserve. Due to this, the amount given in the Random Reserve field must be less than the number in the Max Floor field. (e.g.: On a 5,000 share order with a Max Floor of 300 and a Random Reserve of 200, the order would be displayed at 100, 200, 300, 400 or 500 shares every time it refreshes. The amount displayed is chosen randomly from those choices.)

**Enter Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Type | 0 | 1 | "O" | Identifies this message as an Enter Order Message Type |
| Order Token/Client Order ID | 1 | 14 | Alpha-Numeric | Token must be day unique for each Rash Port account Order ID |
| Side | 15 | 1 | Alpha | B/S/T/E<br>Buy/Sell/Short/Short Exempt |
| Shares/OrderQty | 16 | 6 | Numeric | Total Number of shares entered. Must be greater than zero |
| Stock Symbol | 22 | 8 | Alpha | Stock Symbol |
| Price | 30 | 10 | Price | 6.4 (implied decimal) |
| Time In Force | 40 | 5 | Numeric | The number of seconds that this order should live before being automatically canceled. Special values for Time in Force are listed here. |
| Firm/Client ID | 45 | 4 | Alpha | MPID |

**Enter Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Display | 49 | 1 | Alpha | Y = Anonymous-Price to Comply N = Non-Displayed<br>A = Attributable- Price to Display<br>I = Imbalance Only<br>P = Post-Only (For stocks over $1, NTX Post Only Orders will remove liquidity at any price equal to or better than its limit.)<br>W = Mid-Point Peg Post Only<br>M = Mid-Point Peg<br>O = Retail Order Type 1<br>T = Retail Order Type 2<br>Q = Retail Price Improvement Order<br>R = Retail Price Improvement Order, Hidden Price Improvement Indicator |
| MinQty | 50 | 6, | Numeric | Minimum Fill Amount Allowed |
| Max Floor | 56 | 6 | Numeric | Shares to Display. If zero this field will default to the order qty. Use the display field to specify a hidden order. |
| Peg Type | 62 | 1 | Alpha | M – Midpoint<br>N – No Peg<br>P – Market<br>R – Primary |
| Peg Difference Sign | 63 | 1 | Alpha | +<br>-<br>If peg type is set to “N”, specify “+” |
| Peg Difference | 64 | 10 | Price | Amount; 6.4 (implied decimal). If peg type is set to “N”, specify “0” |
| Discretion Price | 74 | 10 | Price | Discretion Price for Discretionary Order. If set to “0”, this order does not have discretion. |
| Discretion Peg Type | 84 | 1 | Alpha | M – Midpoint<br>N – No Peg<br>P – Market<br>R – Primary |
| Discretion Peg Difference Sign | 85 | 1 | Alpha | +<br>-<br>If peg type is set to “N”, specify “+” |
| Discretion Peg Difference | 86 | 10 | Price | Amount; 6.4 (implied decimal). If peg type is set to “N”, specify “0” |
| Capacity/Rule 80A Indicator | 96 | 1 | Alpha | Capacity Code |
| Random Reserve | 97 | 6 | Numeric | Shares to do random reserve with |
| Route Dest/Exec Broker | 103 | 4 | Alpha | Target ID: INET, BMOP, BSTG, BSCN, BTFY, BCRT, TFYB, BCST, BDRK, BSKP, BSKN, SCAR and “Directed Orders”<br>See Directed Order Destination Code table here. |
| Cust/Terminal ID/ Sender SubID | 107 | 32 | Alpha-Numeric | Client Initiated; Pass-thru. Must be left-justified. |

### 2.1.1. Special Values for Time in Force

**Special Values for Time in Force Value**

| | Explanation |
|---|---|
| 0 | Immediate or cancel (IOC). If no match for the order is available at the moment the order is accepted, any unexecuted shares in the order are immediately canceled. If the order is routable (strategy other than INET), an IOC will result in the order trying to exhaust all potential liquidity at the specified price before returning. |
| 99991 | On Open, Non-NASDAQNASDAQ Texas-Listed. Use to send an On-Open order in non-NASDAQ-listed securities, when used in conjunction with a "DOT" strategy. To do a limit-on-open, send with a limit price; to do market, send with pegging set toMarket. |
| 99992 | On-Close, Non-NASDAQ-Listed. Use to send an On-Close order in non-NASDAQ-listed securities when used in conjunction with a "DOT" strategy. To do a limit-on-close, send with a limit price; to do market, send with pegging set to Market. |
| 99994 | For some routing strategies, this TIF designates that the order be re-routed every four minutes or so. |
| 99998 | Market Day. Indicates that the order should remain live until the market close on the primary market for the security. |
| 99999 | NASDAQ Texas Day. Indicates that the order should remain live until the end of the NASDAQ Texas trading day. |

### 2.1.2. Directed Order Destination Codes

**Directed Order Destination Codes**

| Market Center | Destination Code |
|---|---|
| NYSE American | ISAM |
| NYSE Arca | ISPA |
| Nasdaq | ISNQ |
| CBOE | ISCB |
| NYSE Chicago | ISCX |
| NYSE National | ISCN |
| NYSE | ISNY |
| BATS Z | ISBZ |
| BATS Y | ISBY |
| EDGA | ISNA |
| EDGX | ISNX |
| Nasdaq PSX | ISPX |
| IEX | ISIX |
| Long Term Stock Exchange | ISLT |
| Members Exchange | ISMX |
| MIAX PEARL Equities | ISMI |
| 24 Exchange | IS24 |
| Texas Stock Exchange | ISTX |

## 2.2. Enter Order Message with Additional Functionality

**Enter Order Message with Cross Functionality**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Type | 0 | 1 | "Q" | Identifies this message as an Enter Order Message with Additional Functionality |

**Enter Order Message with Cross Functionality**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Order Token/Client Order ID | 1 | 14 | Alpha-Numeric | Token must be day unique for each Rash Port account Order ID |
| Side | 15 | 1 | Alpha | B/S/T/E<br>Buy/Sell/Short/Short Exempt |
| Shares/OrderQty | 16 | 6 | Numeric | Total Number of shares entered. Must be greater than zero |
| Stock Symbol | 22 | 8 | Alpha | Stock Symbol |
| Price | 30 | 10 | Price | 6.4 (implied decimal) |
| Time In Force | 40 | 5 | | The number of seconds that this order should live before being Numeric timed automatically canceled. Special values for Time in Force are listed here. |
| Firm/Client ID | 45 | 4 | Alpha | MPID |
| Display | 49 | 1 | Alpha | Y = Anonymous-Price to Comply<br>N = Non-Displayed<br>A = Attributable- Price to Display<br>"d" = Direct Listing Capital Raise<br>I = Imbalance Only<br>P = Post-Only (For stocks over $1, BX Post Only Orders will remove liquidity at any price equal to or better than its limit.)<br>W = Mid-Point Peg Post Only<br>M = Mid-Point Peg<br>O = Retail Order Type 1<br>T = Retail Order Type 2<br>Q = Retail Price Improvement Order, Retail Price Improvement Indicator (RPII)<br>R = Retail Price Improvement Order, No RPII |
| MinQty | 50 | 6 | Numeric | Minimum Fill Amount Allowed. |
| Max Floor | 56 | 6 | Numeric | Shares to Display. If zero this field will default to the order qty.<br>Use the display field to specify a hidden order. |
| Peg Type | 62 | 1 | Alpha | M – Midpoint<br>N – No Peg<br>P – Market<br>R – Primary |
| Peg Difference Sign | 63 | 1 | Alpha | +<br>-<br>If peg type is set to “N”, specify “+” |
| Peg Difference | 64 | 10 | Price | Amount; 6.4 (implied decimal). If peg type is set to “N”, specify “0” |
| Discretion Price | 74 | 10 | Price | Discretion Price for Discretionary Order. If set to “0”, then this order does not have discretion. |
| Discretion Peg Type | 84 | 1 | Alpha | M – Midpoint<br>N – No Peg<br>P – Market<br>R – Primary |

**Enter Order Message with Cross Functionality**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Discretion Peg Difference Sign | 85 | 1 | Alpha | +<br>-<br>If peg type is set to "N", specify "+" |
| Discretion Peg Difference | 86 | 10 | Price | Amount; 6.4 (implied decimal). If peg type is set to "N", specify Difference "0" |
| Capacity/Rule 80A Indicator | 96 | 1 | Alpha | Capacity Code |
| Random Reserve | 97 | 6 | Numeric | Shares to do random reserve with |
| Broker Route Dest/Exec | 103 | 4 | Alpha | Target ID: INET, BMOP, BSTG, BSCN, BTFY, BCRT, TFYB, BCST, BDRK, BSKP, BSKN, SCAR and "Directed Orders"<br>See Directed Order Destination Code table here. |
| Cust/Terminal ID/Sender SubID | 107 | 32 | Alpha-Numeric | Client Initiated; Pass-thru. Must be left-justified. |
| Inter-market sweep eligibility | 139 | 1 | Alpha | Y – eligible<br>N – not eligible<br>y = Trade-at Intermarket Sweep Order |
| Cross type | 140 | 1 | Alpha | O – opening cross<br>C – closing cross<br>N – order is immediately live (don't wait for a cross)<br>R - Retail Cross |
| Customer Type | 141 | 1 | Alpha | Indicates if the order is a retail designated order (optional field)<br>"R" = Retail designated order<br>"N" = Not a retail designated order |
| Reactive Trade Now | 142 | 1 | Alpha | Indicates if the order is a reactive trade now order (optional field)<br>"B" = Reactive Trade Now<br>"N" = Not a Reactive Trade Now order |

## 2.3. Cancel Order Message

The Cancel Order Message is used to request that an order be canceled. To cancel the entire balance of an order, you would enter a Cancel Order Message with a Shares field of zero. To cancel down, you would enter a Cancel Order Message with a Shares field of the new intended order size. This means that if you want to cancel 200 shares out of 1,000 share order, you must send a Shares field of 800.

**Cancel Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Type | 0 | 1 | "X" | Identifies this message as a Cancel Order Message |
| Order Token/Client Order ID | 1 | 14 | Alpha-Numeric | The Order Token as was originally transmitted in an Enter Order Order ID Message |
| Shares | 15 | 6 | Numeric | Specify zero to cancel the order. |

# 3. Outbound Sequence Messages

Outbound messages are generated by the RASH host port and received by your client application.

## 3.1. System Event Messages

System Event Messages signal events that affect the entire NASDAQ Texas system

**System Event Message**

| Name | Offset | Len | Value | Notes |
|---|---|---|---|---|
| Time Stamp | 0 | 8 | Timestamp | See Data Types here. |
| Message Type | 8 | 1 | "S" | System Event Message |
| Event Code | 9 | 1 | Alpha | See Event Codes here. |

### 3.1.1. System Event Codes

**System Event Codes Code**

| Code | Explanation |
|---|---|
| S | Start of Day. This is always the first message each day. It indicates that NASDAQ Texas is open and ready to start accepting orders. |
| E | End of Day. This indicates that NASDAQ Texas is now closed and will not accept any new orders in this session. There will not be any more executions during this session, however, it is still possible to receive Broken Trade messages and Canceled Order Messages |

## 3.2. Order Messages

Order messages inform you about each event in the lifetime of your orders.

### 3.2.1. Accepted Order Message

An Accepted Order Message acknowledges the receipt of a valid Enter Order Message. The data fields from the Enter Order Message are echoed back in the Order Accept Message. Please note: The accepted values may differ for the entered values for some fields. You should receive an Accepted Order Message for an order before you get any Canceled Order Messages or Executed Order Messages for the order except when there is a race condition where a cancel request is received before an order goes live on our system.

**Accepted Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Time Stamp | 0 | 8 | Numeric | |
| Type | 8 | 1 | "A" | Identifies this message as an Order Accepted Message |
| Order Token/Client Order ID | 9 | 14 | Alpha-Numeric | Token must be day unique for each RASH Port account |
| Side | 23 | 1 | Alpha | B/S/T/E<br>Buy/Sell/Short/Short Exempt |
| Shares/OrderQty | 24 | 6 | Numeric | Total Number of shares entered. Must be greater than zero |
| Stock Symbol | 30 | 8 | Alpha | Stock Symbol |
| Price | 38 | 10 | Price | 6.4 (implied decimal) |
| Time In Force | 48 | 5 | Numeric | Seconds (OUCH. conforming) |
| Firm/Client ID | 53 | 4 | Alpha | MPID |

**Accepted Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Display | 57 | 1 | Alpha | Y = Anonymous-Price to Comply<br>N = Non-Displayed<br>A = Attributable- Price to Display<br>I = Imbalance Only<br>P = Post-Only (For stocks over $1, NTX Post Only Orders will remove liquidity at any price equal to or better than its limit.)<br>"d" = Direct Listing Capital Raise<br>W = Mid-Point Peg Post Only<br>M = Mid-Point Peg<br>O = Retail Order Type 1 T = Retail Order Type 2<br>Q = Retail Price Improvement Order, Retail Price Improvement Indicator (RPII)<br>R = Retail Price Improvement Order, No RPII |
| Order Reference Number | 58 | 9 | | The day-unique Order Reference Number assigned by NASDAQ Texas to this order. |
| MinQty | 67 | 6 | Numeric | Minimum Fill Amount Allowed |
| Max Floor | 73 | 6 | Numeric | Shares to Display. If zero this field will default to the order qty.<br>Use the display field to specify a hidden order. |
| Peg Type | 79 | 1 | Alpha | M – Midpoint<br>N – No Peg<br>P – Market<br>R – Primary |
| Peg Difference Sign | 80 | 1 | Alpha | +<br>- |
| Peg Difference | 81 | 10 | Price | Amount; 6.4 (implied decimal) |
| Discretion Price | 91 | 10 | Price | Discretion Price for Discretionary Order |
| Discretion Peg Type | 101 | 1 | Alpha | M – Midpoint<br>N – No Peg<br>P – Market<br>R – Primary |
| Discretion Peg Difference Sign | 102 | 1 | Alpha | +<br>- |
| Discretion Peg | 103 | 10 | Price | Amount; 6.4 (implied decimal) Difference |
| Capacity/Rule 80A Indicator | 113 | 1 | Alpha | Capacity Code |
| Random Reserve | 114 | 6 | Numeric | Shares to do random reserve with |
| Route Dest/Exec Broker | 120 | 4 | Alpha | Target ID: INET, BMOP, BSTG, BSCN, BTFY, BCRT, TFYB, BCST, BDRK, BSKP, BSKN, SCAR and "Directed Orders"<br>See Directed Order Destination Code table here. |
| Cust/Terminal ID/ Sender SubID | 124 | 32 | Alpha-Numeric | Client Initiated; Pass-thru |

### 3.2.2. Accepted Order Message with Cross Functionality

Similar to the regular Accepted Order Message, with the additional information provided upon order entry using the Enter Order Message with Cross Functionality. Please note that the "R" Order Message Type can be used for the entry of all order types, including those in the "A" Order Message Type.

**Accepted Order Message with Cross Functionality**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Time Stamp | 0 | 8 | Numeric | |
| Type | 8 | 1 | "R" | Identifies this message as an Order Accepted Message |
| Order Token/Client Order ID | 9 | 14 | Alpha-Numeric | Token must be day unique for each RASH Port account |
| Side | 23 | 1 | Alpha | B/S/T/E |
| Buy/Sell/Short/Short Exempt | | | | |
| Shares/OrderQty | 24 | 6 | Numeric | Total Number of shares entered. Must be greater than zero |
| Stock Symbol | 30 | 8 | Alpha | Stock Symbol |
| Price | 38 | 10 | Price | 6.4 (implied decimal) |
| Time In Force | 48 | 5 | Numeric | Seconds (OUCH conforming) |
| Firm/Client ID | 53 | 4 | Alpha | MPID |
| Display | 57 | 1 | Alpha | Y = Anonymous-Price to Comply<br>N = Non-Displayed<br>A = Attributable-Price to Display<br>I = Imbalance Only<br>P = Post-Only (For stocks over $1, NTX Post Only Orders will remove liquidity at any price equal to or better than its limit.) W = Mid-Point Peg Post Only<br>M = Mid-Point Peg<br>"d" = Direct Listing Capital Raise<br>O = Retail Order Type 1<br>T = Retail Order Type 2<br>Q = Retail Price Improvement Order, Retail Price Improvement Indicator (RPII)<br>R = Retail Price Improvement Order, No RPII |
| Order Reference Number | 58 | 9 | | The day-unique Order Reference Number assigned by NASDAQ Texas to this order. |
| MinQty | 67 | 6 | Numeric | Minimum Fill Amount Allowed |
| Max Floor | 73 | 6 | Numeric | Shares to Display. If zero, this field will default to the order qty.<br>Use the display field to specify a hidden order. |
| Peg Type | 79 | 1 | Alpha | N – No Peg<br>P – Market<br>R – Primary |
| Peg Difference Sign | 80 | 1 | Alpha | +<br>- |
| Peg Difference | 81 | 10 | Price | Amount; 6.4 (implied decimal) |
| Discretion Price | 91 | 10 | Price | Discretion Price for Discretionary Order |

**Accepted Order Message with Cross Functionality**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Discretion Peg Type | 101 | 1 | Alpha | M – Midpoint<br>N – No Peg<br>P – Market<br>R – Primary |
| Discretion Peg Difference Sign | 102 | 1 | Alpha | +<br>- |
| Discretion Peg Difference | 103 | 10 | Price | Amount; 6.4 (implied decimal) |
| Capacity/Rule 80A Indicator | 113 | 1 | Alpha | Capacity Code |
| Random Reserve | 114 | 6 | Numeric | Shares to do random reserve with |
| Route Dest/Exec Broker | 120 | 4 | Alpha | Target ID: INET, BMOP, BSTG, BSCN, BTFY, BCRT, TFYB, BCST, BDRK, BSKP, BSKN, SCAR and "Directed Orders"<br>See Directed Order Destination Code table here. |
| Cust/Terminal ID/ Sender SubID | 124 | 32 | Alpha-Numeric | Client Initiated; Pass-thru |
| Inter-market sweep | 156 | 1 | Alpha | Y – eligible<br>N – not eligible eligibility<br>y = Trade-at Intermarket Sweep Order |
| Cross type | 157 | 1 | Alpha | O – opening cross<br>C – closing cross<br>N –immediately live |

### 3.2.3. Canceled Order Message

A Canceled Order Message informs you that an order has been reduced or canceled. This could be acknowledging a Cancel Order Request Message or it could be the result of the order timing out or being canceled automatically.

Please note that a Cancel Order Message does not necessarily mean the entire order is canceled; some portion of the order may still be live. Canceled shares will reflect the number of shares that are "out."

**Canceled Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Time Stamp | 0 | 8 | Numeric | |
| Type | 8 | 1 | "C" | Identifies this message as an Order Canceled Message |
| Order Token/Client Order ID | 9 | 14 | Alpha-Numeric | The Order Token as was originally transmitted in an Enter Order Message |
| Shares | 23 | 6 | Numeric | The number of shares canceled |
| Reason | 29 | 1 | Alpha | The reason the order was reduced or canceled. See Cancel Order Reasons here. |

#### 3.2.3.1. Cancel Order Reasons

**Cancel Order Reasons Reason**

| | Explanation |
|---|---|
| "U" | User requested cancel. Sent in response to a Cancel Request Message. |
| "I" | Immediate or Cancel Order. |
| "T" | Timeout. The Time In Force for this order has expired |

**Cancel Order Reasons Reason**

| | Explanation |
|---|---|
| “S" | Supervisory. The order was manually canceled or reduced by an NASDAQ supervisory terminal. |
| “D" | This order cannot be executed because of a regulatory restriction (e.g.: trade through restrictions). |
| “Q" | Self Match Prevention. The order was cancelled because it would have executed with an existing order entered by the same MPID. |
| “Z" | System cancel. This order was cancelled by the system. |
| “K" | This order cannot be executed because of Market Collars |
| “E" | Closed. Any DAY order that was received after the closing cross is complete in a given symbol will receive this cancel reason. |
| “J" | System cancel. This order was cancelled because it was rejected by an away destination; includes midpoint orders cancelled due to a crossed market. |
| “A" | Administrative cancel. This order was cancelled by the system. |

### 3.2.4. Rejected Order Message

A Rejected Order Message may be sent in response to an Enter Order Message if the order cannot be accepted at this time. The reason for the rejection is given. No further actions are permitted on this order.

The Token of a rejected order cannot be re-used.

**Rejected Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Time Stamp | 0 | 8 | Numeric | |
| Type | 8 | 1 | “J” | Identifies this message as an Order Rejected Message |
| Order Token/Client Order ID | 9 | 14 | Alpha-Numeric | The Order Token as was originally transmitted in an Enter Order Message |
| Reason | 23 | 1 | Alpha | See Reject Order Reasons here. |

#### 3.2.4.1. Rejected Order Reasons

**Rejected Order Reasons**

| Reason | Explanation |
|---|---|
| “a” | Risk: Restricted Stock |
| "A" | Advance Features Not Allowed |
| “b” | Risk: Short Sell Restricted |
| "B" | Quote not available for pegged order. |
| “C” | NASDAQ Texas is Closed |
| “d” | Risk: Exceeds ADV Limit |
| "D" | Invalid Display value |
| “e” | Risk: Fat Finger |
| "E" | Invalid Peg |
| “F” | Order not marketable Conflicting instructions Improper cross type |
| “G” | Destination Not Available |
| “H” | Security is Halted |
| “I” | Invalid Order Side |
| “J” | Processing Error |

**Rejected Order Reasons**

| Reason | Explanation |
|---|---|
| “K” | Invalid Minimum Quantity |
| “l” | Risk: Locate Required |
| "L" | Invalid Firm |
| “M” | Outside of Permitted Times for Clearing Destination |
| “n” | Risk: Max Notional Exceeded |
| "N" | Invalid Routing Instructions |

| "W" | Invalid Destination |
| “x” | Risk: Executed Exposure Exceeded |
| "X" | Invalid Price |
| “y” | Risk: Notional Exposure Exceeded |
| "Y" | No Shares Found for Routing |
| “Z” | Quantity Exceeds Threshold |

### 3.2.5. Executed Order Message

An Executed Order Message informs you that all or part of an order has been executed.

**Executed Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Time Stamp | 0 | 8 | Numeric | |
| Type | 8 | 1 | “E” | Identifies this message as an Order Executed Message |
| Order Token/Client Order ID | 9 | 14 | Alpha-Numeric | The Order Token as was originally transmitted in an Enter Order Message |
| Shares | 23 | 6 | Numeric | The number of shares executed |
| Price | 29 | 10 | Numeric | The price at which the execution occurred |
| Liquidity | 39 | 1 | Alpha | See Liquidity Flag table here. |

**Executed Order Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Match number | 40 | 9 | Numeric | Assigned by NASDAQ Texas to each match executed. Each match consists of one buy and one sell. The Matching buy and sell executions share the same match number. |

#### 3.2.5.1. Liquidity Flags

**Liquidity Flags Flag**

| Flag | Value |
|---|---|
| A | Added |
| R | Removed |
| J | Non-displayed and added liquidity |
| X | Routed |
| D | DOT |
| F | Added or Opening Trade (on NYSE) |
| G | Odd Lot or On-Close order (on NYSE) |
| Y | Re-Routed by NYSE |
| S | Odd Lot Execution (on NYSE) |
| U | Added Liquidity (on NYSE) |
| E | NYSE Other |
| P | Routed to PSX |
| T | Opening Trade (on ARCA) |
| Z | On-Close order (on ARCA) |
| Q | Routed to Nasdaq |
| m | Removed liquidity at a midpoint |
| k | Added liquidity via a midpoint order |
| j | RPI (Retail Price Improving) order provides liquidity, Retail Price Improvement Indicator (RPII) |
| r | RMO Retail Order removes RPI liquidity |
| t | RMO Retail Order removes price improving non-displayed liquidity other than RPI liquidity |
| q | RMO Retail Order removes non-RPI midpoint liquidity |
| 4 | RPI order provides liquidity, executes against RMO order with notional ≥ $10,000 |
| 6 | RMO order removes RPI liquidity, notional ≥ $10,000 |
| 7 | Displayed, liquidity-adding order improves the NBBO |
| 8 | Displayed, liquidity-adding order sets the NTXBBO while joining the NBBO |
| p | Removed price improving non-displayed liquidity |
| N | Passive Midpoint Execution |
| 1 | RPI order provides liquidity, No RPII |
| u | Added non-displayed liquidity via a Reserve Order |

#### 3.2.6. Broken Trade Message

A Broken Trade Message informs you that an execution has been broken. The trade is no longer good and will not clear. The reason for the break is given.

You will always get an Executed Order Message prior to getting a Broken Trade Message for a given order/execution.

**Broken Trade Message**

| Name | Offset | Length | Value | Notes |
|---|---|---|---|---|
| Time Stamp | 0 | 8 | Numeric | Timestamp |
| Message Type | 8 | 1 | "B" | Broken Trade Message |
| Order Token | 9 | 14 | Alpha- Numeric | The order Token field as entered. |
| Match Number | 23 | 9 | Numeric | Match Number as transmitted in the preceding Executed Order Message. |
| Reason | 32 | 1 | Alpha | The reason the trade broken. See Broken Trade Reasons table here. |

##### 3.2.6.1. Broken Trade Reason

**Broken Trade Reason Reason**

| | Explanation |
|---|---|
| "E" | Erroneous. The trade was deemed clearly erroneous |
| "C" | Consent. The two parties mutually agreed to break the trade |
| "S" | Supervisory. The trade was manually broken by a NASDAQ Texas supervisory terminal. |
| "X" | External. The trade was broken by an external third party. |
